

ARK profile for corporate sponsors

Here's a breakdown on rescues or large number of animals taken in. Of course it's usual to have five or six puppies or kittens taken in at one time. I have just put in special cases. Hirata san should send you the breakdown of numbers in and out per month over the years. Will work more on the history tomorrow. ARK diary started in newsletter 37 so before that we are somewhat in the dark but Kishida san and I will work on this. As I said, it takes time but it's good to get it down once.

I have also written numbers over 10 in numerals.

Liz

DOGS

Jan - Dec 1995 ARK takes in 600 animals, including dogs, cats, rabbits and chicken left homeless by the Great Hanshin Earthquake. Note; many animals that came in were put down as 'boarding' i.e. they had owners who could possibly take them back. it didn't always turn out this way but some animals were only in for literally a few days.
