in aid of humane research
to save laboratory animals

3 million die

Laboratory animals endure ... deliberately induced heart attacks ... poisoning ... brain mutilation ... burning ... blinding ... implanted cancers ... lifelong confinement — the suffering and deprivation is endless.

Exposés last year revealed how monkeys are mistreated in British laboratories, being slapped, punched and taunted during experiments. BUAV investigator, Terry Hill, described their treatment and cages as *close to hell on earth*.

Something must be done to put an end to this suffering.

BY SELLING THESE TICKETS
YOU WILL HELP TO SAVE
ANIMALS LIKE MOLLY (BELOW)
JUST ONE OF 3 MILLION
ANIMALS TO DIE IN BRITISH
LABORATORIES LAST YEAR.

How YOU Can Help

More equals less More funds mean that we can finance more non-animal research so that less and less animals will be used in medical research. **By selling these tickets to friends you will not only be raising much needed funds but raising their awareness too!**

Recent media coverage has heightened people's sensitivity to animal issues. In our experience they are willing to participate in a Prize Draw to benefit laboratory animals — **especially when they are contributing to medical research that helps people too.**

Someone has to win the first prize of £500, who knows, it could be you or one of your friends!! Tickets are 50p each, every book will raise £5, a sum which will be multiplied many times over by concerned people like yourself.

Once you have sold the tickets please complete the form on the inside cover of the prize draw booklet. Send it together with money (cheque or PO) and stubs to The Dr Hadwen Trust, 22 Bancroft, Hitchin, Herts SG5 1JW. If you wish to order more books please indicate so on the same form. Thank you for your help and commitment, it is truly appreciated.

Putting humanity into research

Using alternative research techniques means saving animals now — so the Trust's work to develop alternatives is more important than ever.

Whilst more than 2 million laboratory animals endure experiments in which no pain relief is given, it is essential for the Trust to step up its work to change attitudes in the scientific community by the most convincing means possible: producing results without animals.

Overleaf you can see for yourself how we are developing, right now, research techniques that could save cats, monkeys, rabbits and other animals — vital work to keep them out of the laboratory.

CLAIM YOUR FREE T-SHIRT

WHEN YOU SELL FIVE OR MORE BOOKS
WE WILL SEND YOU A THANK YOU GIFT
OF A FREE DR HADWEN TRUST
DESIGNER T-SHIRT.
To claim your T-Shirt just pop a note in with
the returned stubs and money and we'll send
your designer T-Shirt asap!
