

**ON THE LIFE AND DEATH OF THE "FIGHTING BULL"
AND WHO ARE THOSE WHO MAKE IT STILL POSSIBLE...**

Biologically speaking, the "fighting bull" DOESN'T exist. "Fighting" means the bull will forcibly die on the arena in a most unequal contest in front of spectators cheering at the suffering and death of the bull, after he's been cheated, mocked and massacred with brutal, specialized instruments for hours! This, after having tried his "wildness", which he doesn't possess by nature but through obscene manipulation at the school of pain and via genetic engineering manipulation. Thus, they could also invent the "fighting dog", the "fighting lamb", the "fighting fly"...

In this bloody ritual invented by the Human Devil is where the bullfighter (torero) must show his "art". Those who enjoy bullfighting go to mass in the morning to pray to their Catholic God and in the afternoon destroy God's creation. Especially priests, nuns, bishops, popes, EVERYONE, men and women alike at the Catholic churches. But bullfighting has nothing to do with religious rites. It's purely a business of the minority feudal wealthy who preserve their old privileges and make it impossible for anyone to achieve a real agricultural reform in Spain. Thus, all these feudal wealthy own near-slave servants who are made to suffer a miserable existence and not knowing how to read and write, while perpetuating their poverty and misery, especially in the South and East of Spain, and forcing the masses to emigrate, causing them cultural shock, isolation and even racism, at the same time pushing them to become bullfight addicts by making them believe it's a good cause!

Birth of the Bull

Fighting bull breeders test the "braveness" of the cow "the mother", by stabbing her up to 16 times to see if she can defend herself and play the fighting game. If not, it proves she won't breed a fighting bull and goes to slaughterhouse! If she shows to be "very" brave, she's mated with a bull "less brave" to avoid breeding too "brave" a bull which may kill the bullfighter. This
