"national hero" pretends he's fighting a wild beast by showing great caution with his cape and sword. This "hero" keeps alive the bloody/terrorist/fascist/savage/repulsively sadist Spanish "culture"! "Science" has now invaded the cattle farms shamelessly applying genetic manipulation to make "bulls to order". They are being "manufactured" for the convenience of the bullfighter, who will torture/murder the bull for money, false prestige and entertainment. This terrifying news was published in various bullfighting media by bull breeders and bullfighters themselves. When the new breed is born, the calf is snatched from the mother after a few short days in order to make him suffer loneliness and thus make him "brave". People who've witnessed this and the very same farm bosses say it's most horrifying to hear the crying and screams of the baby bull aching for his mommy like a forlorn little human baby. His martyrdom to agonizing death has begun!

The bull grows in seclusion, isolated, with only his caretaker and his loneliness. He's a tame animal who eats vegetation from our hands. He's a bovine, like lambs and goats. He's NOT a wild animal! If he doesn't know you, he runs away scared.

At 6 months old the baby is tested for "braveness" as his mother was. If he passes, he'll spend about 4 years out in the pastures until his death. He's the innocent "escape goat" forced to pay for the evils invented by the Spaniards. Only 6 months before dying will the bull receive special food. Then he'll be tortured and humiliated in front of cold/indifferent/sick/sadist spectators at the macabre/obsolete "Spanish culture".

If this bull can't be used for fighting (because he's slow) he'll serve as entertainment in Spring/Summer throughout the towns of Spain, tied to a truck, where people fight him, tear off his tail, plunge into him broken glass, pointed iron bars and other pointed tools all over his body, then is dragged through the streets by a rope, with fire balls between his horns, slowly killing him by blows with excavating tools, boards, lances, and thrown live downhill. There are so very many sadistic ways in which they torture him (and all other animals during the
