... And more incredibly cruel/bizarre tortures!!!

At 5:30 PM a bugle sounds. This is the bull's beginning of his end... The public paid in order to enjoy in person his suffering/humiliation/undignified death... The Roman circuses have been abolished but Spaniards now created new innocent victims: helpless animals who don't have any rights - not even to a dignified death! Most kings, bishops, civil army, ministers, presidents, "nobility", the masses, foreign honor guests, EVERYONE, choose to enjoy this obscene act and shout with wild loudness demanding more and more and more bloodshed of the animal ... Ah...

The bull rushes into the arena like an arrow. Ready to attack? Oh no! After over 24 hours in a small dark box, he rushes to the sunlight, BUT, at hearing the public's clamor, he knows he's trapped and tries to escape and many times in despair he'll jump over the barrier but... he's forced back to the bloody arena. HE WILL DIE!!! The long, gruesome ritual is ruthless but very lucrative business and defended to death! Hence, they want to keep the uneducated masses (their clients) happy in their bloody addiction! The bull is only an object for their sordid ends!!!

The first harpoon is an iron pike (divisa) deeply plunged into his back. Its top is covered with multicolor ribbons... but they quickly become red from the bull's blood.
