

The objects include experimental animals, too - the first trial in our country - and the facilities of colleges, hospitals, and laboratories must be registered and the management or treatment of animals are to be checked districtly, so as not to be cruel for animals.

2. Animal health is equal to human health.

The prevention of pet diseases spreading among many homes accompanied with pet boom is an urgent necessity, and it is important to make ways to protect epidemics common to both men and animals. For example, hundreds of pet shops in this area will owe the duty to register and be inspected or guided by officials.

To enact these laws, they will have many examinations next one year.
