DOG MEAT BROUGHT IN FROM SOUTH AMERICA

13,009 kg of dog meat was brought in from El Salvador to Pusan harbour but kept in at container yard presently. According to the Customs Dept., the Viva importing company brought the frozen dog meat in to Pusan from El Salvador on 14th of Aug but kept them at container yard because the dog meat is not considered as food by the livestock production and sanitation act. One official of the Customs Dept. states that according to the customs law and other related act of present customs act, the dog meat is allowed to bring but the Dept. is not going to give permission to pass through because of the Livestock sanitation and production act. To pass through the Customs Dept. of the importing, the company have to submit the certifications of the food sanitation and inspection act, and the certifications of the livestock disease control act.
