

Dewey's Wheelchairs For Dogs Inc.
PO Box 1439
Prineville, OR 97754
877-312-2122

Thank you for allowing me to help your pet be more mobile!

Enclosed you will find your invoice and instructions for adjusting, balancing, placing and removing your pet with the wheelchair. Please read all the instructions before placing your pet into the wheelchair. If you need assistance, please do not hesitate to call.

Your pet should readily take to the freedom the wheelchair gives them, however some pets may take time to adjust to using it. Please do not leave your pet unattended while in the wheelchair. If your pet shows signs of wanting to lay down, fatigue or wearing out, please remove them from the wheelchair. Pets that have been inactive for awhile may have to use the wheelchair for shorter periods of time in order to allow them to regain their strength. If your pet has some weakness in the front legs, you may find attaching a leash to the front harness and lifting up to provide them support that may be helpful.

It is always a good idea to send photos or a video of your pet in the wheelchair. This would allow me to evaluate the fit of the wheelchair and make suggestions that would help improve the fit and balance. Also the photos and stories may be used on my web site, if this is something that you may be interested in.

Sincerely,

Dewey's Wheelchairs For Dogs Inc.
