

Philosophy of owner is questioned.

(5)

On the contrary, stray cats and dogs have been captured by autonomy and disposed or used for animal experiment such as medicine and cosmetic. That led to the voice of being cruel from the animal protection group.

Now we have a question about : euthanasia.

According to a report on government, In 1989, the number disposed animals are, dogs are 380,000, cats 320,000. In several years, 700,000 cats and dogs lost their life legally.

The case of terminal disease having pain most people agree with euthanasia, but the case of transfer, (moving) there is a question.

Pro-euthanasia - It is so miserable that if pet cats and dogs are thrown away and they could be used animal experiment.

Anti-euthanasia - It's human egoist to deprive animals of their life. An operation of spaying should be done to decrease the number of animals which became victims of human.

The case of foreigner who back to country, we should search for new owner and strive for coexistence. But it's very hard to solve this problem.
