

4/14/95

DEAR Everyone,

I've finally finished off the roll of film of Wendy in her new home so I'll send them shortly. She is very, very happy but she does have severe heart damage from when she had heartworm. I've spent 400.00 on vet bills to get her the best diagnostic care + treatment possible. Except for regular heartworm pills now. We're over the hill. She is in love with my family + they adore her. She's lost 7 lbs + does tricks now! She + Alex are best buddies but it's my mom she loves best.

Wendy is going very well. Both Laurie + I are working for HSUS starting in May. I saw Annemike last week. She says hey! We've been really broke. Michael was very sick recently but we'll be okay soon God willing.

Please let me know who has been rehomed. I think about them all so often. How is Husk?

I really hope that we were of some help to you. CWB says that they're almost ready for Mercury. I'm so happy about that. She deserves to be wild + free. You were wonderful to rescue her, now you have a chance to set her free to live as she should. I envy you.

I hope you are all well. Do you need anything?

Let me know. I think of you all often + wish you the best in everything.

Love,
